

# SUPPORTING THE CONTINUUM OF INTRAOPERATIVE NERVE CARE

## PROTECT & ASSESS ● PREPARE & REPAIR ● HEAL & RESTORE

When Checkpoint Surgical introduced the original Checkpoint Nerve Stimulator, it inspired surgeons to think differently about nerve protection. Checkpoint's safe nerve stimulation opened opportunities for unexpected clinical applications, with surgeons themselves discovering new and innovative uses for the device. Today, Checkpoint is regarded as the standard of care for intraoperative nerve stimulation and is used every day for nerve protection, assessment and repair across a wide variety of surgical procedures.

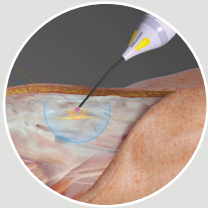

Beyond stimulation, Checkpoint Surgical continues to deliver solutions for the entire continuum of intraoperative nerve care, from nerve protection and assessment, to nerve preparation and repair, to nerve healing and restoration.

# SUPPORTING THE CONTINUUM OF INTRAOPERATIVE NERVE CARE

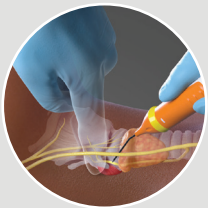

## PROTECT AND ASSESS

### CHECKPOINT GUARDIAN™ Nerve Stimulator

Versatile across a range of applications, including nerve location, assessment, and intraoperative modeling, with enhanced features for information delivery.

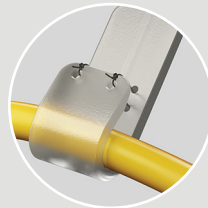

### CHECKPOINT® HEAD & NECK Stimulator/Locator

Provides visual confirmation of nerve function and location for head and neck surgeries, protecting nerves even in obscured anatomy.

### CHECKPOINT GEMINI™ Bipolar Nerve Stimulator

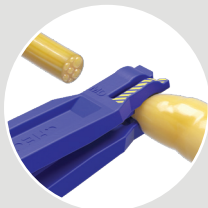

Delivers focused stimulation of specific nerves and fascicles, supporting surgical actions based on the most precise information available.

### CHECKPOINT GUARDIAN™ Intraoperative Lead Accessory

Compatible with monopolar probes, allows hands-free stimulation in situations where repeated stimulation is warranted.

## PREPARE AND REPAIR

### CHECKPOINT EDGE™ Nerve Cutting Kit

Employs circumferential constraint to maintain the nerve's natural shape during transection, preserving fascicular group alignment and tissue integrity.

### NEUROSHIELD® Chitosan Membrane

A chitosan polysaccharide membrane that provides a protective barrier during nerve tissue healing. Transparent for better visualization. Easy to suture. Conforms to tissue.

## HEAL AND RESTORE
